July 2014

What about ice generators?

The GEA Refrigeration France policy aims at improving its technology and the reliability of its equipment for the satisfaction of the world users. We are bringing improvements to our flake models with accents made on performance & efficiency, hygiene and durability while preserving competitive prices.

New bearing arrangement for machines F200 to F600

A new bearing arrangement is now used for the ice generators F200 and F250, this new bearing arrangement is described as an housing bearing arrangement.

The F600 ice generator was already equipped with that type of bearings in steel version.

Since the 1.07.2014 these bearings are supplied in stainless steel on all our F200, F250 & F600

Old flanged bearing arrangement

New stainless steel housing bearing arrangement

It has to be noticed that these two bearing arrangements are not exchangeable, the new version cannot be installed on old machines. The following machines are concerned, the F200, F250, F600 ABF& SBF, PACKS 31 to 40.
