What about ice generators?

The GEA Refrigeration France SAS policy aims to improve its technology and the reliability of its equipment for the satisfaction of the world users. We are bringing improvements to our flake ice generators with accents made on performance & efficiency, hygiene and durability while preserving competitive prices.

New bearing arrangement for machines F90

Following modifications on previous models F 200, F250 and F600, a new bearing arrangement in stainless steel is now used for the ice generators F90, this new bearing arrangement is described as a closed housing bearing arrangement.

Since the 1.09.2015 these bearings are supplied in stainless steel on all our F90H, F90V, F90SH,

Old flanged bearing arrangement

new stainless steel housing bearing arrangement

It has to be noticed that these two bearing arrangements are not exchangeable; the new version cannot be installed on old machines. The PACKS 20, 21, 22, 23 & 30 are also concerned.
